Company
Presentation

Make in India

Who are we We are a Indian start-up company based in Mysuru. Young committed team possessing agility in machine manufacturing for the PCB industry. We understand the market and our machines are for all scale and technology focused by Indian PCB manufacturers.

VISION To be a leading Indian machine design and manufacturing company exclusively for the PCB Industry

Mission We will competently engineer client-focused PCB processing machines and continue to stay competitive in tomorrow's world.

VALUE Commitment, Honesty, Accountability

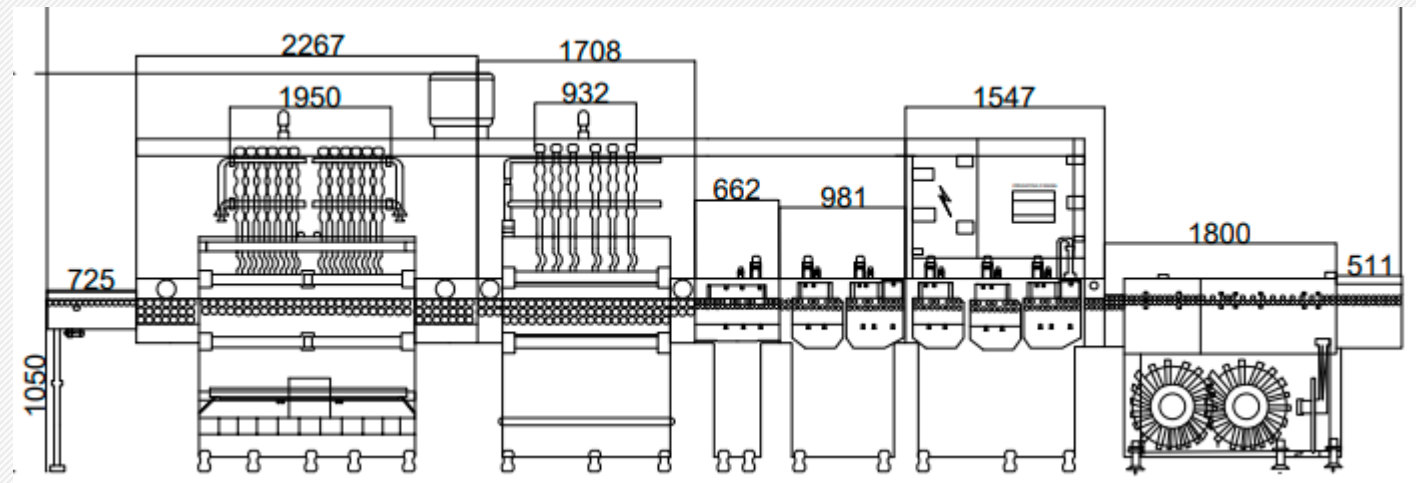

Objective

- Make in India : Indegenious design and development
- Adopt new design technology in the market to bring new ideas.
- Customer oriented :Adapt unique customer requirement.
- Team : Work together with supply partners to deliver better ideas.
- Quality : We ensure compliance with industry regulations and customer satisfaction
- Competitive pricing: Aim to achieve affordable machines for all business scale.
- Local sourcing : Empower and encourage local supply chain.
- Leadtime: We commit to deliver as promised.
- Employee : An asset to company. Encouraged and empowered.

Dry Film Pre clean
